

NIMRA RASHEED

AI Engineer — Full-Stack AI Product Development

nimiiwritess@gmail.com · 0303 5314499 · Punjab, Pakistan · GitHub · Nimii Labs

SUMMARY

AI engineer and full-stack developer who builds complete AI products end-to-end — pipeline design, prompt engineering, structured-output validation, and production deployment. Additional experience across classical machine learning, computer vision, and reinforcement learning.

TECHNICAL SKILLS

AI / ML: LLM pipeline design, prompt engineering, structured-output validation, Claude API, Groq API, Gemini API, Random Forest, XGBoost, LSTM, Transformer architectures, PPO, SAC

Languages & Frameworks: JavaScript/TypeScript, Python, React, Next.js, Vite, Tailwind CSS

Backend & Data: Node.js, Express.js, REST API design, Firebase, Pandas, NumPy

Tools: Git, Vercel, VS Code, Gymnasium, Stable-Baselines3

EXPERIENCE

Independent Product Developer

Self-employed · May 2026 – Present

- Designed, built, and deployed two full-stack AI products (Dhaal and Nimii Labs), owning product design, AI pipeline design, prompt engineering, frontend/backend implementation, and deployment.
- Designed multi-stage LLM workflows incorporating planning, generation, evaluation, structured outputs, and validation.
- Integrated Claude, Groq, and Gemini APIs into production applications with structured, validated outputs rather than unrestricted free-form responses.
- Applied AI reliability techniques including evidence grounding, claim-level citation requirements, validation, and multi-criteria evaluation.

SELECTED AI PROJECTS

Dhaal — AI Verification Tool

Next.js · TypeScript · Tailwind CSS · Claude API

- Built a full-stack app where users submit suspicious messages or screenshots and receive an evidence-cited analysis; engineered the system prompt to require citation for every claim and avoid fabricated confidence.

Live: [Dhaal live URL]

Nimii Labs — AI Script Generation & Validation Platform

React · Vite · Express.js · Firebase · Groq API · Gemini API

- Built a multi-stage AI pipeline (planning, generation, judging, scoring) to generate and evaluate short-form video scripts.
- Implemented a multi-criteria scoring system evaluating hook strength, retention, readability, and platform fit into a composite score.

Live Demo: nimii-labs-ai.vercel.app

ADDITIONAL AI / ML PROJECTS

- Machine Learning: Classification modeling (Random Forest, XGBoost, LSTM, Transformer architectures) on Google Cluster/Borg workload traces, applying SMOTE for class imbalance and evaluating via accuracy, F1, and ROC-AUC.
- Computer Vision: Image classification and segmentation for skin-lesion analysis on the ISIC 2018 dataset using deep learning.
- Reinforcement Learning: Trained PPO and SAC agents on BipedalWalker using Gymnasium and Stable-Baselines3, with reward shaping and VecNormalize across multi-million-timestep training runs.

EDUCATION

MSc, Computer Science

Islamia University Bahawalpur, Pakistan — 2021

PEEF Scholarship recipient, 2018
